Bill Transfer for Orthodontic Braces

2023-1-11

The Bill Transfer for Orthodontic Braces has been added to the treatment. This function uses to transfer the amount from one bill to another bill. The condition that the previous bill has a certain amount to be transferred and the current bill to receive the transfer must meet.

When a doctor does Orthodontic Braces for a patient the total bill for Orthodontic Braces has been created by another doctor, and the current doctor needs to obtain an income transfer from the previous account.

Material Management System

2022-12-06

The Material Management System (MMS) is a subset of the Inventory Management System. It is used to record the material input/output, keep track of the material stock, and prompt to order when stock runs low to reorder level.

The Material Management System is used to record the patient that the doctor used material (current support implant material) on the patient. it is easy to generate a report of used materials.

To use the MMS, input the material into Material Stock first, and then the doctor can use the stock items to create the used material records (including doctor, patient, treatment ID, date, and material items)

Input the material into the material stock
